N. Lat { LHA > 180: Zn = Z
LHA < 180: Zn = 360 - Z

S. Lat { LHA > 180: Zn = 180 - Z
LHA < 180: Zn = 180 + Z

Color Key

- Navigator Entry
- Almanac
- HO 249 Vol 1
- **X** Copy from other
- ***X*** Copy to other

Hs - Height Sextant
Ho - Height Observed (Hs with corrections)
Hc - Height Computed (from tables)

11 For Moon UL shot, - 30'
For Polaris, use Q table, add to Ho, result is Lat, the end.
22 d is neg if declication is descending
24 d corr is negative if d is negative, see 22
31 if Hc > Ho, throw is Away, else Towards (Hc >= Away) (NM)

22-25 For **selected** stars, skip 22-25, use LHA to lookup Hc (29) and Zn (33) from HO249 vol 1.
29 & 33

16 & 25 For **non-selected** stars, add 17 (SHA) to compute GHA (hrs + inc + SHA), then lookup declination in almanac, put in row 25 and proceed with 26
